

INSTALLATION

Step 1

Verify assembly kit contents

A.

B.

C.

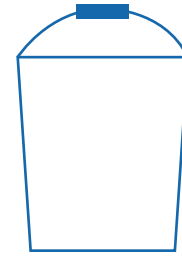

D.

A. 1 Aquus filter
B. 1 Hole cutter

C. 1 Filter cleaner (syringe)
D. 1 Filter hanger

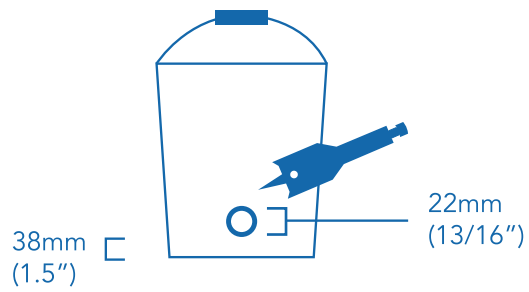

Step 2

Find a "chemical-free" bucket

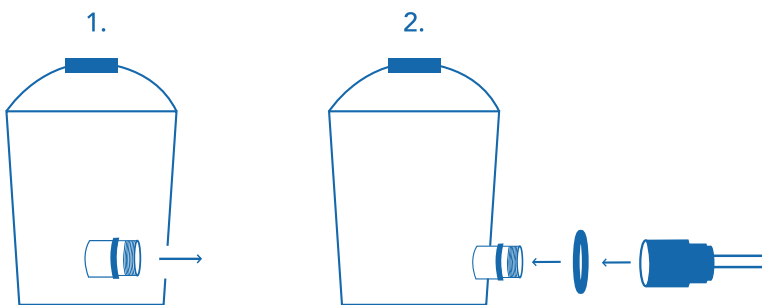

Step 3

Drill a hole in the bucket

Step 5

Install male and female adapters

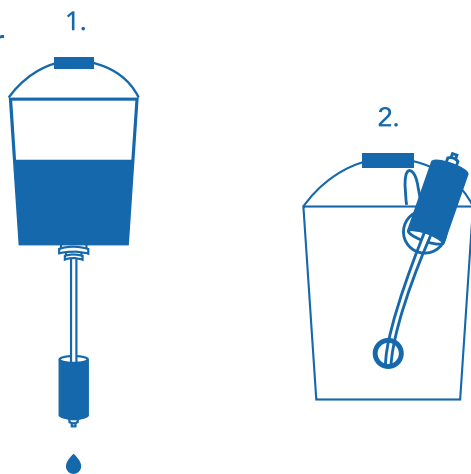

1. Place the male adapter through the hole inside the bucket.

2. Place the o-ring onto the male threads on the outside of the bucket and screw the female adapter back onto the male threads.

Step 6

Filtering water

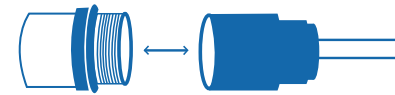

1. Add water to the bucket and lower the filter head below the bottom of the bucket to start the flow.

2. Raise filter above pail to stop filter water flow. When not in use, hang filter hook onto to the rim of the bucket above the water line.

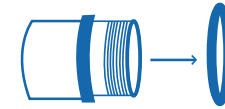

Step 4

Prepare the adapter

1. Unscrew male adapter from female adapter

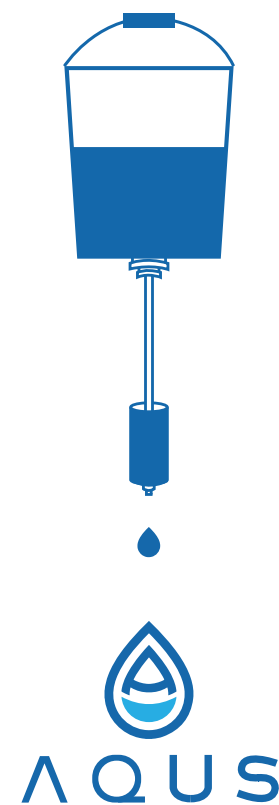

2. Remove the o-ring from male adapter

★ Before first time drinking and after cleaning, allow the filter run for a few seconds before using the water.

AQUSAFE WATER FILTER Bucket Adapter

Environmentally Friendly

Quick Filtration (1 liter/minute)

3 Year Lifespan

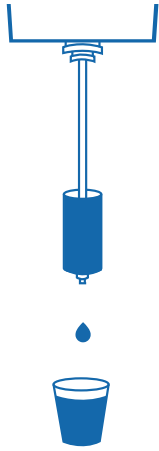

Make Any Fresh Water Safe to Drink

CLEANING

Step 1

Set aside one cup of CLEAN water

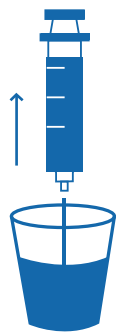

Step 2

Disconnect filter from hose

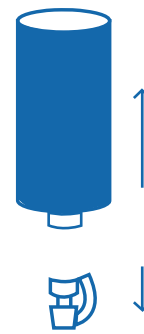

Step 3

Fill filter cleaner (syringe) with water

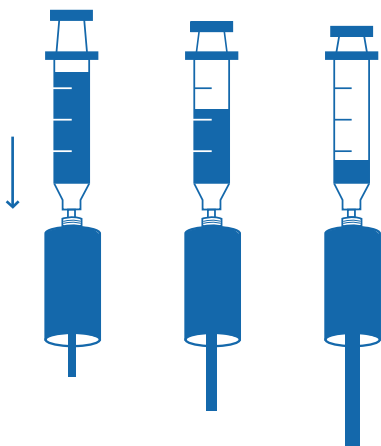

Step 4

Remove the outflow cap and place the syringe on the outflow side of the filter

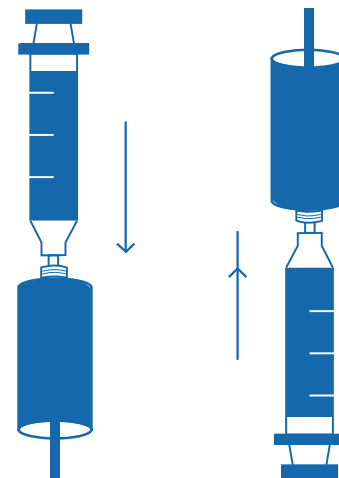

Step 5

Backflush filter 3 times using clean water

Step 6

Backflush from both inflow and outflow (forwards and backwards) as needed

REFRESH

- 1 It is recommended to occasionally soak your filter in a water bleach solution to prevent any potential bacterial growth.
- 2 If you find that your filter is clogged/slow after cleaning, soak and/or backflush filter with warm, clean water.
- 3 If the filter is still clogged or your water source is known to have high calcium levels in it, soak/backflush with hot vinegar.

PRODUCT WARRANTY

Lifetime warranty guaranteed with Aqus water filters against manufacture defects.
