Turn on the water faucet to start filtering

★ Before first time drinking and after cleaning, allow the filter run for a few seconds before using the water.

AQUSAFE WATER FILTER

Faucet Adapter

Environmentally Friendly

Quick Filtration (1 liter/minute)

3 Year Lifespan

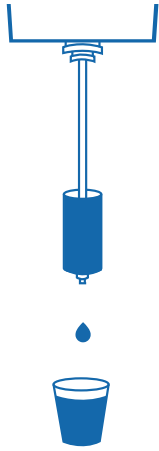

Make Any Fresh Water Safe to Drink

CLEANING

Step 1

Set aside one cup of CLEAN water

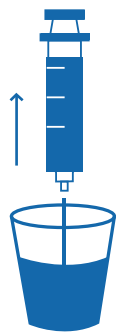

Step 2

Disconnect filter from hose

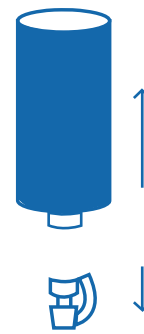

Step 3

Fill filter cleaner (syringe) with water

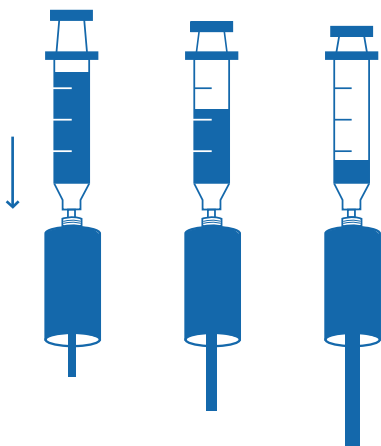

Step 4

Remove the outflow cap and place the syringe on the outflow side of the filter

Step 5

Backflush filter 3 times using clean water

Step 6

Backflush from both inflow and outflow (forwards and backwards) as needed

REFRESH

- 1 It is recommended to occasionally soak your filter in a water bleach solution to prevent any potential bacterial growth.
- 2 If you find that your filter is clogged/slow after cleaning, soak and/or backflush filter with warm, clean water.
- 3 If the filter is still clogged or your water source is known to have high calcium levels in it, soak/backflush with hot vinegar.

PRODUCT WARRANTY

Lifetime warranty guaranteed with Aqus water filters against manufacture defects.
